Governmental and NGO Business Development Organizations

Since many years sananet is supporting Governmental and NGO Business Development and Trade Agencies in their effort to successfully expand business of the local health care industry to the European and especially German speaking markets (DACH-Region).

sananet has a modular program for such State Business and Innovation Agencies and Trade Promoting Organizations.

Economic and trade development is mostly done by non for profit organizations, sponsored by the government or the Trade Development Council is part of the Ministry of Economy and Industry.

As sananet is consulting for governmental Business Development and Trade Agencies since many years, we are aware that there is a procurement process necessary. We look forward to such competition as we know from concrete examples in the past that sananet's offer is somehow unique and there is hardly any other consultancy which can offer such detailed and KPI oriented projects on success basis.
