Excerpt

Transformation of other Industries into Medical Technology

The sananet consultancy advises industrial companies, e.g. from the automotive sector, to enter the life science market, health care sector or medical device market, in order to build up [a second mainstay in medical technology](#).

On sananet's website <https://sananet.com/en/medical-technology-for-industry/> you will find first information on our consulting support to make sub-suppliers and service providers successful in the medical product market.
